**Exam** : **1z1-1075**

**Title** : Oracle Manufacturing and  
Maintenance Cloud 2019  
Implementation Essentials

**Vendor** : Oracle

**Version** : DEMO

**NO.1** You are reviewing the production status of your manufacturing plant shop floor as a production supervisor.

Your production manager wants a report on a work order status which is reserved against a particular

customer. The final assembly of the work order is serialized.

Which option shows the steps to complete the task using the mobile application?

**A.** Use your mobile camera to scan the bar coded serial number of the final assembly> Upload the barcode

to open the work order details page > Click Actions and select the E-mail icon> Select required work orders> Select the e-mail client, enter the recipient's e-mail, and click Send.

**B.** Select the infotile Customer to open the work order details page> Click Actions and select the E-mail

icon> Select required work orders>Select the e-mail client, enter the recipient's e-mail, and click Send.

**C.** Search the work order by customer name to open the work order details page> Click Actions and select

the E-mail icon> Select required work orders> Select the e-mail client, enter the recipient's e-mail, and click Send.

**D.** Use your mobile camera to scan the bar coded serial number of the final assembly> Upload the barcode

to open the work order details page> Select required work orders> Click Social icon (OSN) > Select recipient, and click Share.

**Answer:** A

**NO.2** The Plant Manager informs you that they have bought several machines for their manufacturing plant ABC.

The plant has been set up with a separate cost element set ABC in Manufacturing Cloud. You are requested to

configure these machines in such a way that those are costed to the work order for which operations are

performed on these machines.

Identify the correct setup that you will advise to the Plant Manager.

**A.** Set up the machines as cost element type of "Resource" by selecting Cost Element set AB

**B.** Set up the machines as cost element type of "Overhead" by selecting Cost Element set ABC.

**C.** Set up the machines as cost element type of "Resource" by selecting Cost Element set Common.

**D.** Set up the machines as cost element type of "Overhead" by selecting Cost Element set Common.

**Answer:** C

**NO.3** During a Manufacturing Cloud implementation, the customer request to develop Oracle Transactional

Business Intelligence reports that are not available out-of-the box.

Identify the tool that is available to the Report Developer in Manufacturing Cloud to develop the reports.

**A.** Oracle Business Intelligence Application

- B. Oracle Business Intelligence Enterprise Edition
- C. Oracle Business Intelligence Publisher
- D. Oracle Business Intelligence Standard Edition

**Answer:** C

**NO.4** A Production Operator needs to load Work Order Transactions from an external system into Manufacturing Cloud.

Identify the correct sequence of tasks to be performed.

- A. Load Data to Fusion repository> Export File to UCM server > Process Import Operations Transactions> Load file from UCM to Interface table.
- B. Load Data to Fusion repository> Export File to UCM server > Load file from UCM to Interface table >Process Import Operations Transactions.
- C. Load Data to Fusion repository> Load File from UCM to Interface table> Export File to UCM server> Process Import Operations Transactions.
- D. Export File to UCM server> Load Data to Fusion repository> Process Import Operations Transactions> Load file from UCM to Interface table.

**Answer:** D

**NO.5** Your customer has multiple distribution centers and a few manufacturing plants. Plants make different items with some overlap between them in terms of products manufactured. The distribution centers stock parts from all plants. A Corporate Engineering team is responsible for centrally defining items and catalogues. This team defines the items and sets the attributes for most parameters. The respective distribution centers and manufacturing plants are allowed to change some attributes locally. Identify two different ways of achieving this requirement.

- A. Set up Plants as Inventory Organizations, Distribution Centers as Item Organizations, and Corporate Engineering organization as Item Organization.
- B. Set up Plants as Inventory Organizations, Distribution Centers as Item Organizations, and Corporate Engineering organization as Inventory Organization.
- C. Set up Plants as Inventory Organizations, Distribution Centers as Inventory Organizations, and Corporate Engineering organizations as Item Organization.
- D. Set up Plants and Distribution Centers as Inventory organizations and Corporate Engineering organization as Inventory Organization.
- E. Set up Plants and Distribution Centers as Inventory organizations and Corporate Engineering organization as Item Organization

**Answer:** C,E

**NO.6** A Production operator in your company is required to report production activities, such as completing or scrapping production units, by referencing a work definition without creating work orders. Identify the manufacturing transaction that a production operator can perform for reporting such activities.

- A.** Orderless Transactions
- B.** Material Transactions
- C.** Operation Transactions
- D.** Movement request
- E.** Resource Transactions

**Answer:** A
